International Journal of Fracture

CONTENTS OF VOLUME 70 (1994/1995)

Vol. 70, No. 1, 1994/1995

Stress intensity factors for curvilinear cracks loaded under anti-plane strain (mode III) conditions	J.C.W. van VROONHOVEN	1–18
A large anisotropic damage theory based on an incremental complementary energy equivalence model	ALBERT C.J. LUO, YANGHU MOU and RAY P.S. HAN	19–34
Three-dimensional evaluation of the *T*-stress in centre cracked plates	B.S. HENRY and A.R. LUXMOORE	35–50
Direction of crack extension under general plane loading	M. SHEN and M.-H. HERMAN SHEN	51–58
The effect of mixed mode I/III on crack evolution in brittle solids	DEREK HULL	59–79
Stress intensity factors for *V*-notched strip under tension or in-plane bending	DAI-HENG CHEN	81–97

Vol. 70, No. 2, 1994/1995

An inelastic multiple discrete aperities model for the effects of compressive underloads in fatigue crack growth	G.A. KARDOMATEAS and R.L. CARLSON	99–116
Point weight function method application for semi-elliptical mode I cracks	I.V. ORYNYAK and M.V. BORODII	117–124
Dynamic asymptotic mode III crack tip field in rate-dependent materials	YEONG J. LEE	125–145
Singular integral equation method in optimization of stress-relieving hole: a new approach based on the body force method	NAO-AKI NODA and TADATOSHI MATSUO	147–165
Time-dependent crack growth characterization using rate integrals	K.S. KIM and R.H. VAN STONE	167–181

Vol. 70, No. 3, 1994/1995

Calculation of the stress intensity factor for arbitrary finite cracked body by using the boundary weight function method	CHIEN-CHING MA, I-KUANG SHEN and PWU TSAI	183–202
Effect of electric field on fracture of piezoelectric ceramics	S.B. PARK and C.T. SUN	203–216
Computational analysis of dynamically propagating cracks in axisymmetric solids	C.Y. LO and T. NAKAMURA	217–235
A comparison of crack-flank displacement fitting for estimating K with a path independent integral	D.B. COOPER, G. MEDA and G.B. SINCLAIR	237–251
Notch sensitivity of fiber-reinforced ceramics	PEI GU	253–266
Orthotropic thermoelasticity problem of an antisymmetrical heat flow disturbed by three coplanar cracks	CHEN BAOXING	267–273

Vol. 70, No. 4, 1994/1995

Near-tip dual-length scale mechanics of mode I cracking in laminate brittle matrix composites	R. BALLARINI, P.G. CHARALAMBIDES and S. ISLAM	275–304
Interaction between a spherical inhomogeneity and two symmetrically placed penny-shaped cracks	Z.M. XIAO, K.M. LIEW and M.K. LIM	305–320
A new failure criterion for the Gurson-Tvergaard dilational constitutive model	Z.L. ZHANG and E. NIEMI	321–334
Elastic solutions for corner cracks undergoing uniform displacement-controlled loading	W. ZHAO and M.A. SUTTON	335–346
A 3-D six-noded finite element containing a λ singularity	M.M. ABDEL WAHAB and G. DE ROECK	347–356
Calculation of elasto-plastic strains and stresses in notches under multiaxial loading	A. MOFTAKHAR, A. BUCZYNSKI and G. GLINKA	357–373
